

SQL WHERE - Comparison Operators

Comparison operators are used in the WHERE clause to compare values and filter records.

Comparison Operators in SQL:

<u>Operator</u>	<u>Meaning</u>	<u>Example in WHERE clause</u>
=	Equal to	WHERE name = 'Ravi';
< >	Not equal to	WHERE age < > 25;
>	Greater than	WHERE salary > 50000;
<	Less than	WHERE marks < 60;
> =	Greater than or equal to	WHERE age > = 18;
< =	Less than or equal to	WHERE salary < = 40000;

Examples:

- (1) Select * from Students WHERE age = 20; -- age is equal to 20
- (2) Select * from Employees WHERE salary < > 30000; -- salary is not 30000
- (3) Select * from Products WHERE price > 1000; -- price greater than 1000
- (4) Select * from Orders WHERE quantity < 10; -- quantity less than 10
- (5) Select * from Users WHERE age > = 18; -- age greater than or equal to 18
- (6) Select * from Items WHERE price < = 500; -- price less than or equal to 500

Note:

- * These operators can be used with numbers, text, dates, etc.
- * They are mostly used inside the WHERE clause.

SQL WHERE - Comparison Operators

EXERCISE - Interview Questions

- ① What are comparison operators in SQL? Give examples.
- ② Explain the difference between '=' and '<>' operators.
- ③ Can we use comparison operators with text (strings)? Give example.
- ④ Which operator is used to find values within a range?
- ⑤ What is the difference between '>' and '>='? Give an example.
- ⑥ Write a query to find employees whose salary is not equal to 50000.
- ⑦ Write a query to find products with price less than 1000.
- ⑧ Write a query to find students whose age is greater than or equal to 18.
- ⑨ Write a query to find employees whose salary is between 30000 and 50000 using comparison operators only.
- ⑩ Is NULL a value? How do comparison operators treat NULL?

EXERCISE - Real Scenario Questions

- ① Find all customers whose age is greater than 30. (Table: Customers)
- ② List all orders where total_amount is less than or equal to 2000. (Orders)
- ③ Retrieve all products where price is greater than 1500. (Products)
- ④ Find employees whose salary is not equal to 40000. (Employees)
- ⑤ List students whose marks are less than 60. (Students)
- ⑥ Find all suppliers whose rating is greater than or equal to 4. (Suppliers)
- ⑦ Show all items in inventory where quantity is less than 10. (Inventory)
- ⑧ List all hotel bookings where total_cost is greater than 5000. (Bookings)
- ⑨ Find all users who registered before '2024-01-01'. (Users)
- ⑩ List employees whose experience is between 2 and 5 years (experience > 2 AND experience < 5). (Employees)

Note:

- * Answer all questions using only comparison operators in WHERE clause.
- * Do not use IN, LIKE, BETWEEN, IS NULL or any other operators.
